

Business Intelligence Engineer

Independent Pharmacy Cooperative seeks a Business Intelligence Engineer to design, build, develop, configure, and implement custom applications and 3rd party software applications including Microsoft Dynamics AX, Salesforce and Qlickview to support the technical infrastructure for external and internal customers at its facility in Sun Prairie, WI. The primary focus of this position will be on ERP, business management systems, SalesForce, and BI data analysis systems. Responsibilities will include frequently resolving technical issues and creating solutions to internal and external customer needs, documenting and demonstrating software solutions, managing projects through full life cycles meeting both internal and external users' requirements. Additionally, supporting the ERP and other technical systems by updating code base in C#, .Net, or X++, writing and maintaining custom applications using C#, .Net and/or X++, developing software solutions by studying information needs, systems flow, data usage, and work processes and investigating problem areas and following the software development lifecycle. The position requires a U.S. Master's degree or foreign equivalent in Operations Research, Information Technology, Computer Science, or a related field and demonstrated experience in the following skills: software design and development within Microsoft Dynamics AX, C#, SQL, .Net and X++. Interested candidates should mail a cover letter and resume to Michelle Johnson, HR Director, Independent Pharmacy Cooperative, 1550 Columbus Street, Sun Prairie, WI 53590. Independent Pharmacy Cooperative is an Equal Opportunity Employer.
