

IS PHARMASELF24 TECHNOLOGY AUTHORIZED IN YOUR STATE?

HERE'S WHAT YOU NEED TO KNOW.

PHARMASELF24: THE FUTURE OF PRESCRIPTION PICKUP.

Pharmaself24 is a cutting-edge automated prescription pickup kiosk that enhances your pharmacy's prescription delivery services. By integrating this technology, pharmacies can offer patients and customers a fast and convenient way to pick up their prescriptions, while also improving operational efficiency.

BENEFITS OF PHARMASELF24:

- **Fast prescription pickup:** Customers can pickup prescriptions quickly and easily.
- **Alleviate patient line queues:** Reduces the need for patients to wait in line, providing faster service.
- **24/7 prescription pickup option:** Pharmaself24 allows customers to collect their prescriptions anytime, even outside of normal business hours.
- **Reduce return-to-stock and abandoned prescriptions:** Lessens the frequency of uncollected prescriptions, helping to streamline operations.

HOW PHARMASELF24 WORKS:

- The pharmacy team processes, fills, labels, and verifies prescriptions following their standard procedures before placing into the Pharmaself24 kiosk for customer pickup.
- The Pharmaself24 barcode scanning system ensures prescription delivery accuracy through a unique 6-digit PIN code sent via secure SMS text, allowing only the intended patient/designated representative to access their prescription.
- Pharmaself24 is designated to ensure compliance with applicable pharmacy regulations, providing a secure and reliable solution for prescription pickup.

PHARMASELF24 DOES NOT:

- **Fill prescriptions:** Prescriptions are filled by the pharmacy team, just as they would be in traditional processes.
- **Print or attach labels:** Pharmacy staff will continue to print and attach labels per their usual workflow.
- **Cap, count, or sort medications:** Pharmaself24 is a will-call storage kiosk and does not perform any tasks related to counting, capping, or sorting prescriptions.

Many states have already authorized this technology, while others may require a variance request.
