

MDPNP Readiness Checklist

Enrollment & Access

- Verify MTF + Beacon enrollment and NCPDP profile accuracy.

Workflow & Med Sync

- Enroll every patient on negotiated drugs into med sync. Set 5–7-day pre-call; confirm pickup/delivery; avoid early labeling for high-cost meds.

Ordering & Inventory

- Align order timing to med-sync dates; avoid bulk positions in brands likely to see near-term generic shifts (e.g., Farxiga).

Reconciliation & Cash Flow

- Track each claim's Beacon expected rebate vs. bank deposit; open Beacon tickets for variances; notify IPC so we can escalate patterns. Consider wholesaler extensions on the 10 drugs or short-term credit if needed.

Finance & Contracts

- Review GCR movement and gross margin dollars (not just %). Recalibrate your primary & secondary split accordingly.
