

Nimble. Your New Revenue Stream.

Unlock volume and revenue through a seamless patient checkout experience

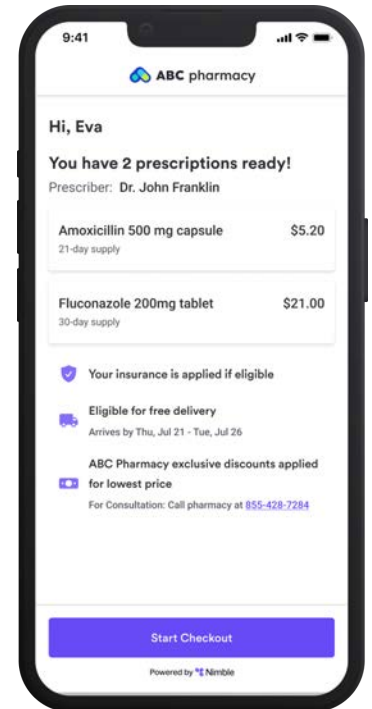

We Do What No One Else Does.

At our core, Nimble is Nimble. We've modeled our business to give you more options to make more money. This means we're able to offer our platform free of charge and even pay our pharmacy partners, like you, for introducing your customers to the Nimble experience.

Your Pharmacy — Open 24/7

For your patients, we have built an online checkout platform that makes it easy for them to order, pay, and sign for their prescription anytime, anywhere. So you'll see:

- More refill volume (+41% per patient)
- More prescriptions sold after hours (+17%)
- More OTC add-ons (+15% in Average Order Size)
- More revenue earned from Experience Payments

Nimble's Pharmacy Partners see an average increase of +\$24,000/ year from Experience Payments.

**Based on only 25% of pharmacy volume processed through Nimble*

Supercharge Your Pharmacy

Experience Payments are just the cherry on top! We've also built out a platform that integrates with your current pharmacy system to make it simple to process refills and orders, print detailed receipts with patient signatures, and trigger messages to patients so they can view order history, track packages, complete payments, and more.

*At Nimble it's our job to deliver a new kind of pharmacy experience.
In the end, everything feels better with a partner on your side.*

Nimble Delivers:
