

Implementing the Remote Patient Monitoring (RPM) Program

Planning and Tracking RPM Implementation

As shown in the RPM IPC webpage, there are many steps and procedures to successfully deploy an RPM program. Provided below is a checklist with these outlined actions to help you and your pharmacy team to prepare, manage, and monitor an RPM program.

Objective	Owner	Date Completed
Define target patient cohorts	<input type="text"/>	<input type="text"/>
Identify and define measurable outcomes	<input type="text"/>	<input type="text"/>
Establish a Collaborative Practice Agreement (CPA)	<input type="text"/>	<input type="text"/>
Secure a RPM Platform and select FDA – cleared devices	<input type="text"/>	<input type="text"/>
Specify staff roles	<input type="text"/>	<input type="text"/>
Determine the program enrollment criteria	<input type="text"/>	<input type="text"/>
Construct internal billing procedures	<input type="text"/>	<input type="text"/>
Develop a structured program training for enrolling patients	<input type="text"/>	<input type="text"/>
Review data and apply clinical thresholds for outreach	<input type="text"/>	<input type="text"/>
Track and audit the implementation process & patient outcomes	<input type="text"/>	<input type="text"/>
Implement refined protocols to meet operational efficiency	<input type="text"/>	<input type="text"/>

Stay Ahead: Critical Compliance Regulations

Implementing an RPM program requires regulatory considerations that must follow healthcare regulations such as payer billing rules and HIPAA compliance. When selecting RPM devices, you must ensure that they meet the FDA requirements and other authority safety approvals.

Why Offer RPM:

- Early detection and intervention
- Strong patient engagement and medication adherence
- New revenue opportunities for independent pharmacies

RPM Managed Diseases

- Diabetes
- Obesity & Heart Conditions
- Hypertension
- Respiratory Conditions
