

A CLINICAL TRIAL • COLORECTAL CANCER

We pay pharmacies to identify patients for *clinical trials*.

The **preferred vendor** for clinical research at your pharmacy.

ABOUT THE STUDY

This national clinical trial is evaluating a new **blood-based screening test** designed to detect colorectal cancer and precancerous conditions in individuals at average risk. Participants provide a blood sample prior to their routine colonoscopy, and results from both will be compared to assess test accuracy.

Participants will receive compensation for their time and effort. Up to \$325–\$475 may be provided.

WHY PHARMACIES ARE JOINING

— 01

New non-dispensing revenue

A service fee for clinical work you are already equipped to do.

— 02

Stronger patient engagement

Conversations that bring neighbors back through your door.

— 03

Marketing support included

We supply the materials to reach the right patients.

YOU EARN

\$140 – \$200

per enrolled patient • monthly electronic payments
priority access to new trials
